AirHawk 50” Wide Ductless Fume Hood

Model # AirHawk50

The AirHawk combines powerful air flow with a sturdy and compact enclosure for optimal respiratory and environmental protection. This state of the art fume hood offers the operator more options for adjustments with the user friendly control panel. The control panel features adjustable light and fan controls, air pressure and runtime digital displays, and an attractive blue decal. The 1400 LUX LED light is the brightest on the market and is unique to the industry with no other competitors’ products that can compare. Light and fan controls allow the operator to make adjustments depending on the application. The air pressure display uses a precision solid state pressure sensor to measure the filter saturation by monitoring the static pressure on the particulate filters. The runtime display helps maintain a consistent PM filter schedule and the ability to reset the runtime after maintenance.

The AirHawk is designed to pull harmful particulate up and away from the operator’s breathing zone and into the filter chamber. Depending on the application, filter choices include HEPA, ASHRAE, ULPA, activated Carbon, or specialty-blended filter media [i.e. acid gas, mercury, aldehyde, ammonia].

Typical uses for the AirHawk include chemical fume control, pharmaceutical compounding, soldering applications, light dust removal, biological applications, solvent or epoxy use, and many more applications that require the removal of fumes and particulate.

For additional visibility, the hood can be made of all clear PVC. The AirHawk comes in standard sizes of 30”, 40”, and 50” with custom sizes available between 30” – 50”. Custom hood construction available.

Our line of ductless fume hoods are not intended for sterile compounding applications.

Product Features

- **1400 LUX at the workplace center — Brightest Light on the Market**
- Infinitely adjustable fan control and LED dimmer switch
- Runtime and air pressure digital displays
- Quiet operation and long filter life
- Simple, quick “no tool” filter change
- Reliable, low maintenance operation
- Ships substantially assembled — Easy Installation
- Clear anti-static vinyl curtains
- Standard sizes: 30”, 40”, 50”
- Custom sizes (30” - 50”) and construction available
# Product Specifications
