

Customized Hoods by

SENTRY AIR SYSTEMS, INC.

What are the [steps](#) to creating your custom hood? _____

- 1. Free Consultation.** The proposed custom hood is discussed with a Sentry Air Systems Applications Specialist to determine the suitability and efficiency of its design in regard to your specific application.
- 2. Conceptual Drawing.** Once the Customer and Applications Specialist agree on the general design, one of Sentry Air's Mechanical Engineers creates a detailed conceptual drawing that includes technical specifications and configurations.
- 3. Customer Approval.** The drawing is sent to the Customer for approval.
- 4. Fabrication.** When the drawing and terms & conditions are approved by the customer, Sentry Air Engineers begin the fabrication process.
- 5. Lead Time.** The lead time for custom hoods varies, but is typically 2 - 3 weeks after approval of the drawing.
