The **Stainless Steel Floor Sentry** is an ESD-Safe fume extractor that was engineered to free up much needed benchtop workspace. This unit is equipped with a self-supportive, anti-static flex hose that can be easily maneuvered by the operator while the base of the unit either sits on the floor or on the benchtop. The self-supportive hose allows the operator to comfortably adjust the hose to the optimal source-capture position.

This system is equipped with an energy-efficient fan and high-quality filtration media: typically HEPA or ASHRAE filtration. These filters are unique in that the primary materials have been constructed from fire-retardant products. HEPA filtration is up to 99.97% efficient on particles 0.3 microns and larger, while ASHRAE filtration is up to 95% efficient on particles 0.5 microns and larger.

The Stainless Steel Floor Sentry is an effective, quiet & economical solution for many soldering operations which require fume extraction. All of Sentry Air's products are proudly manufactured in the United States and are backed by our two-year limited warranty on parts and labor.
