The **Solder Pot Sentry** is a benchtop solder fume extractor that is designed for slightly elevated operations such as solder pot applications. The height stand can be adjusted based on the need of the operator.

This system is equipped with an energy-efficient fan and high-quality filtration media: typically HEPA or ASHRAE filtration. These filters are unique in that the primary materials have been constructed from fire-retardant products. HEPA filtration is up to 99.97% efficient on particles 0.3 microns and larger, while ASHRAE filtration is up to 95% on particles 0.5 microns and larger.

The Solder Pot Sentry offers an effective, quiet, and economical solution for many benchtop soldering operations which require fume extraction. All of Sentry Air's products are proudly manufactured in the United States and are backed by our two-year limited warranty on parts and labor.
