The 30" Wide Portable Clean Room Hood is rated as an ISO Class 5 clean room cabinet. It protects the process by utilizing a vertical laminar flow pattern and dual-stage filtration system that delivers positive-pressure, purified air through a pre-filter and main filter. The main filter is typically either a HEPA or ULPA filter depending on the efficiency desired. The HEPA filter is up to 99.97% efficient on particles 0.3 microns and larger, while the ULPA filter is up to 99.9995% efficient on particles 0.12 microns and larger.

This system has been used in a variety of applications including stem cell therapy practices and other medical applications, data recovery, tissue culturing, manufacturing, cleaning processes, and much more.

This unit is equipped with a Variable Speed Controller for air volume management and a fluorescent light for interior illumination. A UV light is also available for sterilization purposes. The 30" Wide Portable Clean Room Hood offers energy-efficiency and quiet and low maintenance operation for a variety of applications that require a compact, positive-pressure environment.

Our line of portable clean rooms are not intended for sterile compounding applications.
