The 50” Wide Ductless Spray Booth helps to protect the operator’s breathing zone and general working environment from hazardous aerosol spray. This system is a negative-pressure enclosure that utilizes a powerful fan and triple-stage filtration system. A unique internal spray filter, HEPA filter, and Activated Carbon are used in combination to remove airborne particulate and unwanted odors.

This system is ductless and does not require any external venting, which makes it an optimal solution for indoor environments where external venting is not practical or desired. Typical applications include light spray painting, aerosol sprays, epoxy overspray, touch-up painting, conformal coating fumes, and a variety of other processes that release aerosol particulate and odor.

The 50” Wide Ductless Spray Booth is a reliable, energy-efficient, and economical solution for applications that require the control and removal of aerosol spray and odors. In addition to our Standard Portable Spray Booths, we offer Custom Spray Booths for customers with specific application requirements.
