- Custom Material Options
- Other Standard Sizes: 18", 24", 30", 40", 50" 60"
- Anti-Static Vinyl Strip Curtains Included
- Custom Size & Modification Options
- Optional Spill Trays

**Useful for Dual Operator Applications.** The 70" Wide Ducted Fume Hood is the largest standard size option of the Ducted Fume Hood line. This hood offers interior working space and two exhaust outlets that can accommodate dual operators. A standard 24" deep countertop will accommodate this unit; therefore, custom benchtop procurement is typically not necessary.

This exterior-ducting fume hood is suitable for a variety of applications that require fume and particulate control. Examples include processes involving organic volatiles, powder filling, pharmaceutical capsule filling, solvent and epoxy, acid etching, and additional operations where activated carbon or other filtration options may not be a suitable solution. These systems are often found in pharmacies, laboratories, industrial settings such as manufacturing facilities, and research and development spaces.

**Ducted Fume Hoods are Highly Customizable.** Several aspects of Ducted Fume Hoods are customizable. Some options are listed below:

- Size Specifications (width, depth, height, access area)
- Custom Material (e.g. metal, PVC, ESD-safe)
- Cutouts (e.g. sink cutout, microscope cutout)
- Accessories for Hanging Equipment
- Illumination Options (e.g. Black Light)
- Dual-Entry Configuration

This unit includes two 6" Exhaust Collars and does not include ducting or fan. Ask Sentry Air Systems Applications Specialists for assistance in selecting a suitable fan. Sentry Air Systems also manufactures fume hoods that include a fan and filtration media (Ductless Fume Hoods).
