# Model 500/550 Industrial Fume Extractor -7' Heavy-Duty Arm

#### Model # SS-500/550-PFS-MP1/240CF/HEPA

The **Model 500/550 Industrial Fume Extractor** provides fume extraction for heavy-duty and high volume applications such as production welding (*MIG, TIG, stick, plasma cutting*), grinding, powder weighing, some dust collection applications, and more.

This particular configuration has a 7' L and 7" diameter heavy-duty source capture arm with a 10.5" capture hood and 360° swivel radius. Made of aircraft grade aluminum and flexible segments of flame-retardant hose, the heavy-duty extractor arm outfits the **Model 500/550 Industrial Fume Extractor** to provide fume and particulate control for high intensity industrial applications.

This system features four cleanable **Micro-Pleat Series 1 Particulate Filters** that offer the ability to clean the filters with compressed air without removing them from the unit's chassis. The operator simply sprays compressed air into the filter media for cleansing while excess dust and waste fall into the internal dustpan, allowing for easy and clean debris removal. Other filter options include four **HEPA** (non-cleanable) filters, four 42 lb disposable **Activated Carbon Filters**, and four 42 lb **specialty-blended filter media** (acid gas, ammonia, aldehyde, and mercury).

This unit includes a Magnehelic Gauge (MP1 & HEPA models only) to monitor the saturation of the filters. As the filters become saturated, the static pressure increases and the digital readout will display this increase in pressure. Once the pressure reaches a certain point, the filters will need to be cleaned (MP1) or replaced (HEPA).

The **Model 500/550 Industrial Fume Extractor** requires no exterior-ducting or makeup air. Heavy-duty locking casters and a flexible extraction arm make this fume extractor a great solution for applications that require a powerful respiratory engineering control with maneuverability. For a wider range of fume capture, Sentry Air Systems offers a 10' Heavy-Duty Extractor Arm [SS-500/550-WFE-MP1].

### **Product Features**

- Includes: Variable Speed Controller, Magnehelic Gauge (MP1 & HEPA models only), heavy-duty casters, portability handles, and 7' L Heavy-Duty Extractor Arm with 360° rotation
- *Filter Choices:* Micro-Pleat cleanable filters, HEPA filters, Activated Carbon filters, or specialty-blended filter media
- Reliable, low maintenance option
- Long filter-life
- Simple, quick "no tool" filter change
